

PUROFLUX
CORPORATION

HVAC APPLICATION SLIP STREAM

A **Puroflux** separator system in a slip stream installation will decrease the amount of solids that circulate in the condenser loop. A clean system will reduce maintenance, wear and tear on equipment and help keep the system running efficiently.

A **Puroflux** PF-63 or PF-64 series separator system is ideal for this type of application.

PUROFLUX SEPARATOR SYSTEMS CAN BE UTILIZED TO REDUCE THE AMOUNT OF SOLIDS IN THE CONDENSER LOOP.
